**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Applicant has overcome the rejection under 35 USC 112.

***Claim Rejections - 35 USC § 102***

2. Applicant has overcome the previous rejection under 35 USC 102.

***Claim Rejections - 35 USC § 103***

3. Claims 1-7 (as best understood) are rejected under 35 U.S.C. 103(a) as being unpatentable over Duda, 3,950,847 in view of Taniguchi et al, 6,568,083. Please refer to figure 1 of '847. '847, figure 2 and column 3, lines 4 through column 4, lines 32, discloses the claimed invention, including a housing having a passage, the housing containing a motor and a driving means drivable by the motor, at least one short hair cutting device (**5, 6**) projecting out of the housing through the passage and comprising a short hair cutting tool drivable by the motor and driving means **15**, and with a long hair cutting device projecting out of the housing through the passage and comprising a first long hair cutting tool **10** which is not driven by the motor and a second long hair cutting tool **11** drivable by the motor and driving means and located between the first long hair cutting tool and the short hair cutting tool. '847 does not disclose a carrying device that moves the long and short hair cutters between two upper and lower positions, with a slide button. '083, in a similar device, teaches a shaver having a housing, see for example figure 4B, the housing containing the motor and drive means, (the same structure broadly disclosed by applicant, see '083, column 9, lines 34 through column 10, lines 22), the short hair cutter and long hair cutter positioned on a carrier, which has

several positions, the short and long hair cutters project further outside the housing when the carrying device is located in a second position than when it is in a first position, see for example column 7, lines 5-24, "The head frame **70** thus supporting the outer cutters **62** is mounted on tip of the housing and is connected to a height adjust mechanism so as to be vertically moveable relative to the housing between a high position of FIG. 1 and a low position." Further column 7, lines 13-19, "The cutter holders **63** each carrying the outer cutter **62** are provided for short hair shaving, while a long hair shaving cutter unit **66** is also supported to the head frame **70**...". The examiner considers that the rotating dial is a slide button, and that as it rotates, it has a motion component in the vertical direction, which meets the claimed limitation. Note also that the cutting characteristic of the long hair cutter is changed, the characteristic being the distance, without altering a cutting characteristic of the short hair cutter. It would have been obvious to one of ordinary skill in the art to have provided '847 with the carrier and button taught by '083, for the predictable result of moving the cutters within the housing to adjust cutting characteristics of the long hair cutter.

#### ***Response to Arguments***

4. Applicant's arguments filed 30 October 2008 have been fully considered but they are not persuasive. Applicant argues that Duda does not disclose the three cutters as claimed. The examiner disagrees. Please refer to the rejection above. A reading of Duda would clearly explain that there are three cutters, the short hair cutter and one of the long hair cutters driven by the motor and driving means. It is the examiner's position that Duda as modified by Taniguchi makes obvious the claimed invention. If applicant

has other structure, or can further define the structure claimed that would overcome the rejection, it should be claimed..

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
